

## Cat trapping notification

### Letterbox drop

Dear Neighbours,

Cats have been entering my private property and causing a nuisance. I have tried to keep the cats out of my property but have been unsuccessful in my attempts.

Please be advised that over the coming weeks I will be trapping any cat found roaming on my property.

All trapped cats will be taken to one of the following cat management facilities (*tick as appropriate*):

|                          |                                |
|--------------------------|--------------------------------|
| <input type="checkbox"/> | RSPCA, Spreyton                |
| <input type="checkbox"/> | RSPCA, Hobart                  |
| <input type="checkbox"/> | RSPCA, Launceston              |
| <input type="checkbox"/> | Just Cats Tasmania, Mowbray    |
| <input type="checkbox"/> | Ten Lives Cat Centre, New Town |

If you are the owner of a cat that allows your cat to roam, please make sure that your cat has identification, through a tag, collar or microchip, so you can be notified should your cat be trapped.

Information about how to contain cats to your property and requirements under the *Cat Management Act 2009*, can be found on the TassieCat website: [www.tassiecat.com](http://www.tassiecat.com)

Kind Regards,

Your Neighbour
